AQUASPRING SPAS

Developed with customer therapy research

Designed for comfort and pure water filtering

Aquaspringspas® is one of the leading and most original manufacturers for hot tubs, swim spa and indoor spas in China.

Aquaspringspas® excellent quality is guaranteed by adopting American materials (acrylics, digital control system) and other superior materials with our many year's experience. Our production capacity is growing to meet increasing world demand. We work with our customers to become a reputable quality brand offering quality products and services that provide dependable, innovative, and efficient solutions to meet customer needs.

STANDARD EQUIPMENT

LED lights

A highlight of Aquaspring is the lighting. In addition to the pure colour LED's which are incorporated into the spa shell, (Option) air jets and selected water jets are additionally equipped with LEDs. A perfect vision of colour and water is produced. Let yourself be inspired by the intensity of our unique lighting!

Balboa Control System

The USA made Balboa controls for heat, filter and pumps is the most reliable in the world, we exclusively only fit Balboa control products with full factory design support.

STANDARD EQUIPMENT

**ARISTECH
ACRYLICS**

ARISTECH Acrylics

The shell is an important part of the spa. Aqua Spring is uncompromising and working exclusively with ARISTECH Acrylics Top quality from America. Great value is placed on: Durable, Beautiful and Easy to Clean spa surfaces.

Stainless Steel Jets

In order to create various massage effects, many therapy water jets are available. In addition, the water jets arrangement is different for each individual massage seat. You will enjoy multiple massage types over each part of the body with outmoving around the spa. We offer four different types of deep therapy water jets:

Wei Navigation series water jets

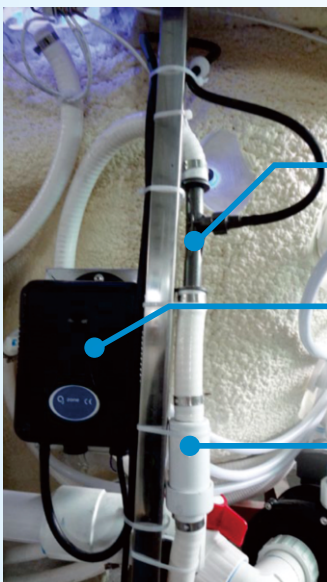

Alpha series water jets

Moon Series water jets

Arnage Series water Jets

(Std) 24 Hr Circulation pump and Ozone

Injector

Ozonator

Mixer

An ozonator supports the disinfection of water and is a very important part for water treatment. In contrast with other spa manufacturers, we use a special Aquaspring Mixer and additional Injector. Hence, the ozone can be optimally mixed before entering into the spa for better disinfection effect, reducing chemical requirement.

Insulation

Shell Insulation

Spa Body Forming: For each Aquaspring spa, the entire spa body is covered with 25-30mm high-density polyurethane foam for better insulation performance

Cabinet Insulation

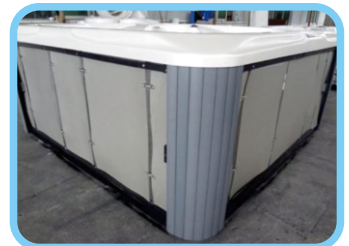

The inner side of spa cabinet is covered with 15mm-thick aluminum foil insulation. Nordic heat lock principals saves energy over most spas.

FRP Base

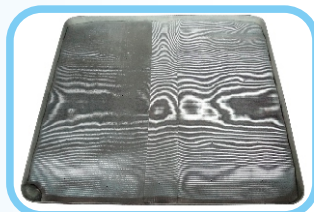

The strong stable base plate is ensuring that no moisture from below can penetrate the hot tub. In addition very little heat loss or heat sink is noticed.

Additional Insulation

In order to maximize the insulation performance, we also have further insulation mats installed in the intermediate space between the stainless steel frame. Your wallet will thank you for it!

Additional Base Insulation

Additional aluminum foil insulation for FRP bottom base is also available for better looking and insulation performance.

HL-18Series

HL-1801

Measurements(L x W x H)	2080 X 1750X 930mm
Sitting places	3 persons
Net weight/ Water volume	270Kgs / 980L
Insulation	25mm
Control box	Balboa
Control panel	Balboa
Heater	3KW (Balboa)
Total number of jets	36pcs (Water jets: 30pcs & Air Nozzles: 6pcs)
Pumps	3pcs
Cartridge filter	2pcs
Water Sanitization	Ozonator
LED lights	8pcs
Headrests	3pcs

Included
Thermo Cover
&
FRP Base

HL-1802

Measurements(L x W x H)	2100 X 2100X 950mm
Reclining / Sitting places	1 person / 5 persons
Net weight/ Water volume	390Kgs / 1430L
Insulation	25mm
Control box	Balboa
Control panel	Balboa
Heater	3KW(Balboa)
